Your local wholesaler

The most user-friendly and reliable home biodiesel processing system in the world!

If you want to produce your own clean-burning biodiesel fuel to run your car, then Green Fuels' new FuelPod2 is the ideal choice. Fuel from 15 pence per litre!!

- produces 50 litres of biodiesel every day from a mixture of waste or new cooking oil and methanol
- fuel dispensing system for easy pumping direct into your car

Safe

- CE and ATEX approved process with air control to avoid any sparks.
- Safe Band technology heats the oil prior to mixing using a thermostatically controlled heater in an integral heating tank.
- Dry purification using Rohm & Haas Amberlite™ BD10DRY™.

Easy to use

- Timed controls.
- Detailed operations manual plus telephone support provided.
- Optional short instruction courses.

Quality

- Low maintenance, robust design.
- Fully draining conical bottom tank.
- Dry caustic or highest quality liquid methylate options.

£2,500
plus VAT

The compact unit is small enough to tuck at the back of a garage and is safe, reliable and easy to use. A 100 litre version is available - please call for more information.

Biofuel is biodegradable, non-toxic and carbon neutral. With increasing fuel duty and oil market prices, any individual or small business can help the environment and save money with the FuelPod2.
